## AUSTRIA IN THE WORLD AND IN THE EU

2023, sources: Eurostat and FAO

Austria is a minor EU-27 producer of farmed products and, as a landlocked country, has few internal catches.

## AQUACULTURE

Source: EUMOFA, based on Eurostat and FAO data

Aquaculture consists in the farming of aquatic (fresh or saltwater) organisms, such as fish, molluscs, crustaceans and aquatic plants. Aquaculture data are reported in live weight equivalent and value. With no direct access to the sea, aquaculture activity in Austria is limited to freshwater farming. The main species produced are trout and carp. Trout is produced in raceways, following a flow-through system. Carp is produced in natural ponds (about 2.700 ha ponds, 550 ha of which devoted to organic fish farming).

## WHOLESALE

Wholesale is an intermediary stage in the distribution channel that buys in bulk and sells to resellers (e.g. retailers) rather than to consumers. About 20 fish wholesale companies are active in Austria. The wholesale market in Vienna-Inzersdorf is mainly involved in sales of fruit and vegetables, flowers and meat, but also hosts fish wholesalers.

## PROCESSING

According to Eurostat-SBS, 174 persons were employed in the Austrian fish processing industry in 2023. The sector recorded a value added of 7,28 million euros, covering only 0,1% of the value added of total manufacture of food products. In 2024, the main product sold were “Fresh or chilled fish fillets and fish meat (including shark fins), whether or not minced” and “Smoked trout (incl. fillets, excluding heads, tails and maws)” (source: Eurostat-PRODCOM).
